NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

**Note 1: Basis of Presentation and Summary of Significant Accounting Policies**

**Basis of Presentation:** The condensed consolidated financial statements included in this report are unaudited and have been prepared in accordance with United States (“U.S.”) generally accepted accounting principles (“U.S. GAAP”) for interim financial reporting and U.S. Securities and Exchange Commission (“SEC”) regulations. The year-end condensed consolidated balance sheet data was derived from audited financial statements, but does not include all disclosures required by U.S. GAAP. Certain information and footnote disclosures normally included in annual financial statements prepared in accordance with U.S. GAAP have been condensed or omitted. In the opinion of management, these financial statements include all adjustments, which are of a normal recurring nature, necessary for a fair statement of the financial position, results of operations, cash flows and the change in equity for the periods presented. The condensed consolidated financial statements for the three and six months ended June 30, 2022, should be read in conjunction with the consolidated financial statements and notes thereto of West Pharmaceutical Services, Inc. and its majority-owned subsidiaries (which may be referred to as “West”, the “Company”, “we”, “us” or “our”) appearing in our Annual Report on Form 10-K for the year ended December 31, 2021 (the “[2021 Annual Report](#)”). The results of operations for any interim period are not necessarily indicative of results for the full year.

West has been actively monitoring the coronavirus (“COVID-19”) situation and its impact globally. Our production facilities continue to operate as they had prior to the COVID-19 pandemic, other than for enhanced safety measures intended to prevent the spread of the virus. The remote working arrangements and travel restrictions imposed by various governments had limited impact on our ability to maintain operations, as our manufacturing operations have generally been exempted from stay-at-home orders.

**Note 2: New Accounting Standards**

**Recently Adopted Standards**

In November 2021, the Financial Accounting Standards Board (“FASB”) issued guidance that seeks to improve the transparency of financial disclosures for government assistance received by business entities. The amendment requires disclosures for transactions with a government accounted for by applying a grant or contribution accounting model by analogy, including (1) the types of transactions, (2) the accounting for those transactions, and (3) the effect of those transactions on an entity’s financial statements. This guidance is effective for fiscal years beginning after December 15, 2021. We adopted this guidance as of January 1, 2022, on a prospective basis. The adoption did not have a material impact on our financial statements.

**Standards Issued Not Yet Adopted**

In March 2020, the FASB issued guidance which provides optional expedients and exceptions to address the impact of reference rate reform where contracts, hedging relationships and other transactions that reference the London Interbank Offered Rate (“LIBOR”) or another reference rate need to be discontinued. This guidance was effective upon issuance and generally can be applied through December 31, 2022. We have identified the contracts impacted by reference rate reform, and have executed certain amendments to replace the use of LIBOR. The Company does not expect such adoption to cause a material impact to the consolidated financial statements.

**Note 3: Revenue**

Our revenue results from the sale of goods or services and reflects the consideration to which we expect to be entitled in exchange for those goods or services. We record revenue based on a five-step model, in accordance with ASC Topic 606. Following the identification of a contract with a customer, we identify the performance obligations (goods or services) in the contract, determine the transaction price, allocate the transaction price to the performance obligations in the contract, and recognize the revenue when (or as) we satisfy the performance obligations by transferring the promised goods or services to our customers. A good or service is transferred when (or as) the customer obtains control of that good or service.

The following table presents the approximate percentage of our net sales by market group:

	Three Months Ended June 30,		Six Months Ended June 30,

Contract Assets and Liabilities

The following table summarizes our contract assets and liabilities:

	(\$ in millions)
Contract assets, December 31, 2021	\$ 14.6
Contract assets, June 30, 2022	14.8
Change in contract assets - increase (decrease)	\$ 0.2
Deferred income, December 31, 2021	\$ (61.3)
Deferred income, June 30, 2022	(65.9)
Change in deferred income - (increase) decrease	\$ (4.6)

During the six months ended June 30, 2022, \$17.5 million of revenue was recognized that was included in deferred income at the beginning of the year.

The majority of the performance obligations within our contracts are satisfied within one year or less. Performance obligations satisfied beyond one year include those relating to a nonrefundable customer payment of \$20.0 million received in June 2013 in return for the exclusive use of the SmartDose® technology platform within a specific therapeutic area. As of June 30, 2022, there was \$3.4 million of unearned income related to this payment, of which \$0.9 million was included in other current liabilities and \$2.5 million was included in other long-term liabilities. The unearned income is being recognized as income on a straight-line basis over the remaining term of the agreement. The agreement does not include a future minimum purchase commitment from the customer.

Note 4: Net Income Per Share

The following table reconciles the shares used in the calculation of basic net income per share to those used for diluted net income per share:

(in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2022	2021	2022	2021
Net income	\$ 188.5	\$ 187.3	\$ 362.3	\$ 338.5
Weighted average common shares outstanding	74.4	74.0	74.4	74.0
Dilutive effect of equity awards, based on the treasury stock method	1.4	1.7	1.5	1.8
Weighted average shares assuming dilution	75.8	75.7	75.9	75.8

During the three months ended June 30, 2022 and 2021, there were 0.1 million and 0.1 million shares, respectively, from stock-based compensation plans not included in the computation of diluted net income per share because their impact was antidilutive. There were 0.1 million and 0.1 million antidilutive shares outstanding during the six months ended June 30, 2022 and 2021, respectively.

In December 2021, our Board of Directors approved a share repurchase program for calendar-year 2022 authorizing the repurchase of up to 650,000 shares of our common stock from time to time on the open market as permitted under Exchange Act Rule 10b-18 or in privately-negotiated transactions. The number of shares to be repurchased and the timing of such transactions will depend on a variety of factors, including market conditions. This share repurchase program is expected to be completed by December 31, 2022.

During the three months ended June 30, 2022, we purchased 86,667 shares of our common stock under the program at a cost of \$28.6 million, or an average price of \$329.40 per share. During the six months ended June 30, 2022, we purchased 476,667 shares of our common stock under the program at a cost of \$175.7 million, or an average price of \$368.54 per share.

**Note 5: Inventories**

Inventories are valued at the lower of cost (on a first-in, first-out basis) or net realizable value. Inventory balances were as follows:

(\$ in millions)	June 30, 2022	December 31, 2021
Raw materials	\$ 177.3	\$ 153.8
Work in process	69.0	63.5
Finished goods	165.3	161.1
	<u>\$ 411.6</u>	<u>\$ 378.4</u>

**Note 6: Leases**

A lease exists when a contract conveys to the customer the right to control the use of identified property, plant, or equipment for a period of time in exchange for consideration. The definition of a lease embodies two conditions: 1) there is an identified asset in the contract that is land or a depreciable asset (i.e., property, plant, and equipment); and 2) the customer has the right to control the use of the identified asset. Lease payments included in the measurement of the operating lease right-of-use assets and lease liabilities are comprised of fixed payments (including in-substance fixed payments), variable payments that depend on an index or rate, and the exercise price of a lessee option to purchase the underlying asset if the lessee is reasonably certain to exercise.

The components of lease expense were as follows:

(\$ in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2022	2021	2022	2021
Operating lease cost	\$ 3.4	\$ 3.1	\$ 6.7	\$ 6.2
Short-term lease cost	0.4	0.3	0.8	0.5
Variable lease cost	1.0	1.4	2.4	2.2
Total lease cost	<u>\$ 4.8</u>	<u>\$ 4.8</u>	<u>\$ 9.9</u>	<u>\$ 8.9</u>

Supplemental cash flow information related to leases were as follows:

(\$ in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2022	2021	2022	2021
Cash paid for amounts included in the measurement of lease liabilities:				
Operating cash flows from operating leases	\$ 3.1	\$ 3.1	\$ 6.3	\$ 6.3
Right-of-use assets obtained in exchange for new operating lease liabilities	\$ 5.8	\$ 0.3	\$ 15.5	\$ 0.8

As of June 30, 2022 and December 31, 2021, the weighted average remaining lease term for operating leases was 10.0 and 10.7 years, respectively.

As of June 30, 2022 and December 31, 2021, the weighted average discount rate was 3.46% and 3.58%, respectively.

Maturities of operating lease liabilities were as follows:

Year	June 30, 2022	December 31, 2021
2022 (remaining period as of )	\$ 6.6	\$ 11.5
2023	12.3	10.7

	95.2	86.4
Less: imputed lease interest	(14.7)	(14.1)
Total lease liabilities	\$ 80.5	\$ 72.3

**Note 7: Affiliated Companies**

At June 30, 2022 and December 31, 2021, the aggregate carrying amount of our investment in affiliated companies that are accounted for under the equity method was \$183.2 million and \$201.2 million, respectively, and the aggregate carrying amount of our investment in affiliated companies that are not accounted for under the equity method was \$10.1 million and \$6.5 million, respectively. We have elected to record these investments, for which fair value was not readily determinable, at cost, less impairment, adjusted for subsequent observable price changes. We test these investments for impairment whenever circumstances indicate that the carrying value of the investments may not be recoverable.

Our purchases from, and royalty payments made to, affiliates totaled \$50.6 million and \$97.6 million, respectively, for the three and six months ended June 30, 2022, as compared to \$47.6 million and \$85.6 million, respectively, for the same period in 2021. As of June 30, 2022 and December 31, 2021, the payable balance due to affiliates was \$33.8 million and \$25.5 million, respectively. The majority of these transactions related to a distributorship agreement with Daikyo Seiko, Ltd. ("Daikyo") that allows us to purchase and re-sell Daikyo products.

Sales to affiliates were \$3.6 million and \$7.6 million, respectively, for the three and six months ended June 30, 2022, as compared to \$3.1 million and \$6.0 million, respectively, for the same periods in 2021. As of June 30, 2022 and December 31, 2021, the receivable balance due from affiliates was \$3.0 million and \$2.3 million, respectively.

Please refer to Note 7, [Affiliated Companies](#), to the consolidated financial statements in our [2021 Annual Report](#) for additional details.

Consistent with the Series A notes defined maturity date, the Company paid the remaining principal balance of \$42.0 million on July 5, 2022.

**Credit Facility**

In March 2022, we amended and extended the existing credit facility (entered into in March 2019), which was scheduled to expire in March 2024, from \$300.0 million to a \$500.0 million senior unsecured revolving credit facility by entering into a Second Amendment and Joinder and Assumption Agreement (the "Amended Credit Agreement"), filed on Form 8-K dated March 31, 2022. The Amended Credit Agreement, which expires March 2027, contains a senior unsecured, multi-currency revolving credit facility of \$500.0 million, with sublimits of up to \$50.0 million for swing line loans for Domestic Borrowers in U.S. dollars and a \$40.0 million swing line loan for West Pharmaceuticals Services Holding GmbH and up to \$50.0 million for the issuance of standby letters of credit. The credit facility may be increased from time-to-time by the greater of (a) \$929.0 million or (b) EBITDA for the preceding twelve month period in the aggregate through an increase in the revolving credit facility, subject to the satisfaction of certain conditions. Borrowings under the credit facility bear interest, at the Company’s option, at either: (a) the Term Secured Overnight Financing Rate (“SOFR”) plus 0.10% plus an applicable margin; or (b) a base rate defined as the highest of: (i) the Bank of America “prime rate”; (ii) the Federal Funds effective rate plus 0.50%; and (iii) Term SOFR plus 1.00%. The applicable margin is based on the ratio of the Company’s Net Consolidated Debt to its modified EBITDA, ranging from 0 to 37.5 basis points for base rate loans and 87.5 to 137.5 basis points for Term SOFR loans. The Amended Credit Agreement contains financial covenants providing that the Company shall not permit the ratio of the Company’s Net Consolidated Debt to its Modified EBITDA to be greater than 3.5 to 1; provided that, no more than three times during the term of the Amended Credit Agreement, upon the occurrence of a Qualified Acquisition for each of the four fiscal quarters of the Company immediately following such Qualified Acquisition, the ratio set forth above shall be increased to 4.0 to 1. The Amended Credit Agreement also contains customary limitations on liens securing indebtedness of the Company and its subsidiaries, fundamental changes (mergers, consolidations, liquidations and dissolutions), asset sales, distributions and acquisitions.

At June 30, 2022, the borrowing capacity available under our \$500.0 million multi-currency revolving credit facility (the “Credit Facility”), including outstanding letters of credit of \$2.4 million, was \$497.6 million.

Pursuant to the financial covenants in our debt agreements, we are required to maintain established interest coverage ratios and to not exceed established leverage ratios. In addition, the agreements contain other customary covenants, none of which we consider restrictive to our operations. At June 30, 2022, we were in compliance with all of our debt covenants.

**Term Loan**

At June 30, 2022, we had \$84.4 million in borrowings under the Term Loan, of which \$2.2 million was classified as current and \$82.2 million was classified as long-term. Please refer to Note 9, [Derivative Financial Instruments](#), for a discussion of the foreign currency hedge associated with the Term Loan.

Please refer to Note 10, *Debt*, to the consolidated financial statements in our [2021 Annual Report](#) for additional details regarding our debt agreements.

**Note 9: Derivative Financial Instruments**

Our ongoing business operations expose us to various risks, such as fluctuating interest rates, foreign currency exchange rates and increasing commodity prices. To manage these market risks, we periodically enter into derivative financial instruments, such as interest rate swaps, options and foreign exchange contracts for periods consistent with, and for notional amounts equal to or less than, the related underlying exposures. We do not purchase or hold any derivative financial instruments for investment or trading purposes. All derivatives are recorded in our condensed consolidated balance sheet at fair value.

**Foreign Exchange Rate Risk**

We have entered into forward exchange contracts, designated as fair value hedges, to manage our exposure to fluctuating foreign exchange rates on cross-currency intercompany loans. As of both June 30, 2022 and December 31, 2021, the total amount of these forward exchange contracts was Singapore Dollar (“SGD”) 601.5 million and \$13.4 million. We have also entered into a forward exchange contract, designated as a fair value hedge, to manage our exposure to fluctuating foreign exchange rates on certain cross-currency intercompany payables. As of June 30, 2022, the total amount of this forward exchange contract was SGD 33.2 million.

In addition, we have entered into several foreign currency contracts, designated as cash flow hedges, for periods of up to eighteen months, intended to hedge the currency risk associated with a portion of our forecasted transactions denominated in foreign currencies. As of June 30, 2022, we had outstanding foreign currency contracts to purchase and sell certain pairs of currencies, as follows:

(in millions)				
Currency	Purchase	USD	Sell	EUR
USD	16.0		—	13.9
JPY	5,786.7		24.0	22.3
SGD	91.3		45.3	20.4

In December 2019, we entered into a cross-currency swap for \$90 million, which we designated as a hedge of our net investment in Daikyo. As of June 30, 2022, the notional amount of the cross-currency swap is ¥9.2 billion (\$84.4 million) and the swap termination date is December 31, 2024. Under the cross-currency swap, we receive floating interest rate payments based on USD compounded SOFR plus a margin, in return for paying floating interest rate payments based on Japanese Yen (“Yen”) Tokyo Overnight Average Rate ("TONAR") plus a margin.

**Commodity Price Risk**

Many of our proprietary products are made from synthetic elastomers, which are derived from the petroleum refining process. We purchase the majority of our elastomers via long-term supply contracts, some of which contain clauses that provide for surcharges related to fluctuations in crude oil prices. The following economic hedges did not qualify for hedge accounting treatment since they did not meet the highly effective requirement at inception.

From November 2017 through June 2022, we purchased several series of call options for a total of 784,299 barrels of crude oil to mitigate our exposure to such oil-based surcharges and protect operating cash flows with regard to a portion of our forecasted elastomer purchases.

As of June 30, 2022, we had outstanding contracts to purchase 257,999 barrels of crude oil from June 2022 to March 2024, at a weighted-average strike price of \$107.02 per barrel.

Effects of Derivative Instruments on Financial Position and Results of Operations

**Note 10: Fair Value Measurements**

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The following fair value hierarchy classifies the inputs to valuation techniques used to measure fair value into one of three levels:

- Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.
- Level 3: Unobservable inputs that reflect the reporting entity’s own assumptions.

The following tables present the assets and liabilities recorded at fair value on a recurring basis:

Deferred compensation assets are included within other noncurrent assets and are valued using a market approach based on quoted market prices in an active market. The fair value of our foreign currency contracts, included within other current and other noncurrent assets, as well as other current and other long-term liabilities, is valued using an income approach based on quoted forward foreign exchange rates and spot rates at the reporting date. The fair value of the cross-currency swap, included within other noncurrent assets, is valued using a market approach. Please refer to Note 9, [Derivative Financial Instruments](#), for further discussion of our derivatives. The fair value of our commodity call options, included within other current and other noncurrent assets, is valued using a market approach. The fair value of the contingent consideration liability, within current and long-term liabilities, related to the SmartDose® technology platform (the “SmartDose® contingent consideration”) was initially determined using a probability-weighted income approach, and is revalued at each reporting date or more frequently if circumstances dictate. Changes in the fair value of this obligation are recorded as income or expense within other (income) expense in our condensed consolidated statements of income. The fair value of deferred compensation liabilities is based on quoted prices of the underlying employees’ investment selections and is included within other long-term liabilities.

Other Financial Instruments

We believe that the carrying amounts of our cash and cash equivalents and accounts receivable approximate their fair values due to their near-term maturities.

The estimated fair value of long-term debt is based on quoted market prices for debt issuances with similar terms and maturities and is classified as Level 2 within the fair value hierarchy. At June 30, 2022, the estimated fair value of long-term debt was \$206.0 million compared to a carrying amount of \$207.8 million. At December 31, 2021, the estimated fair value of long-term debt was \$217.9 million and the carrying amount was \$208.8 million.

**Note 13: Stock-Based Compensation**

The West Pharmaceutical Services, Inc. 2016 Omnibus Incentive Compensation Plan (the “2016 Plan”) provides for the granting of stock options, stock appreciation rights, restricted stock awards and performance awards to employees and non-employee directors. A committee of the Board of Directors determines the terms and conditions of awards to be granted. Vesting requirements vary by award. At June 30, 2022, there were 1,701,231 shares remaining in the 2016 Plan for future grants.

During the six months ended June 30, 2022, we granted 113,828 stock options at a weighted average exercise price of \$366.86 per share based on the grant-date fair value of our stock to employees under the 2016 Plan. The weighted average grant date fair value of options granted was \$96.47 per share as determined by the Black-Scholes option valuation model using the following weighted average assumptions: a risk-free interest rate of 1.8%; expected life of 5.6 years based on prior experience; stock volatility of 25.0% based on historical data; and a dividend yield of 0.2%. Stock option expense is recognized over the vesting period, net of forfeitures.

During the six months ended June 30, 2022, we granted 30,692 stock-settled performance share unit (“PSU”) awards at a weighted average grant-date fair value of \$365.30 per share to eligible employees. These awards are earned based on the Company’s performance against pre-established targets, including annual growth rate of revenue and return on invested capital, over a specified performance period. Depending on the achievement of the targets, recipients of stock-settled PSU awards are entitled to receive a certain number of shares of common stock. Shares earned under PSU awards may vary from 0% to 200% of an employee’s targeted award. The fair value of stock-settled PSU awards is based on the market price of our stock at the grant date and is recognized as expense over the performance period, adjusted for estimated target outcomes and net of forfeitures.

During the six months ended June 30, 2022, we granted 4,290 stock-settled restricted share unit (“RSU”) awards at a weighted average grant-date fair value of \$357.69 per share to eligible employees. These awards are earned over a specified performance period. The fair value of stock-settled RSU awards is based on the market price of our stock at the grant date and is recognized as expense over the vesting period, net of forfeitures.

Stock-based compensation expense was \$5.5 million and \$11.0 million for the three and six months ended June 30, 2022, respectively. For the three and six months ended June 30, 2021, stock-based compensation expense was \$10.3 million and \$16.2 million, respectively.

**Restructuring and Related Charges**

In July 2020, our Board of Directors approved a restructuring plan designed to optimize certain organizational structures within the Company to better support our continued growth and business priorities. These changes are expected to be implemented over a period of up to twenty-four months from the date of approval. The plan is expected to require restructuring and related charges of approximately \$5 million to \$6 million, with annualized savings in the range of \$0.9 million to \$1.6 million. Since its approval, we recorded a net pre-tax amount equal to \$5.2 million in restructuring and related charges associated with this plan.

The following table presents activity related to our restructuring obligations related to our 2020 restructuring plan:

(\$ in millions)	Severance and benefits	Other charges	Total
Balance, December 31, 2021	\$ 2.8	\$ 0.5	\$ 3.3

**Contingent Consideration**

Contingent consideration represents changes in the fair value of the SmartDose contingent consideration. Please refer to Note 10, [Fair Value Measurements](#), for additional details.

**Other Items**

During the three and six months ended June 30, 2022, we recorded a gain of \$0.3 million and \$3.1 million, respectively, related to oil hedges. During the three and six months ended June 30, 2021, we recorded a gain of \$0.7 million and \$1.1 million, respectively, related to oil hedges. Please refer to Note 9, [Derivative Financial Instruments](#), for further discussion of our hedging activity.

During the six months ended June 30, 2021, we recorded an impairment charge of \$2.2 million for one of the Company's cost investments.

During the three and six months ended June 30, 2021, we recorded a net gain of \$1.3 million on the sale of one of the Company's cost investments.

**Note 16: Income Taxes**

The tax provision for interim periods is determined using the estimated annual effective consolidated tax rate, based on the current estimate of full-year earnings before taxes, adjusted for the impact of discrete quarterly items.

The provision for income taxes was \$44.2 million and \$32.3 million for the three months ended June 30, 2022 and 2021, respectively, and the effective tax rate was 19.5% and 15.3%, respectively. The increase in the effective tax rate is primarily due to a decrease in stock-based compensation deduction for the three months ended June 30, 2022 as compared to the same period in 2021. The provision for income taxes was \$65.4 million and \$61.0 million for the six months ended June 30, 2022 and 2021, respectively, and the effective tax rate was 15.8% and 15.8%, respectively.

**Note 17: Commitments and Contingencies**

From time to time, we are involved in product liability matters and other legal proceedings and claims generally incidental to our normal business activities. We accrue for loss contingencies when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. While the outcome of current proceedings cannot be accurately predicted, we believe their ultimate resolution should not have a material adverse effect on our business, financial condition, results of operations or liquidity.

There have been no significant changes to the commitments and contingencies included in our [2021 Annual Report](#).

**Note 18: Segment Information**

Our business operations are organized into two reportable segments, Proprietary Products and Contract-Manufactured Products. Our Proprietary Products reportable segment offers proprietary packaging, containment and drug delivery products, along with analytical lab services and other integrated services and solutions, primarily to biologic, generic and pharmaceutical drug customers. Our Contract-Manufactured Products reportable segment serves as a fully integrated business, focused on the design, manufacture, and automated assembly of complex devices, primarily for pharmaceutical, diagnostic, and medical device customers.

The Chief Operating Decision Maker ("CODM") evaluates the performance of our segments based upon, among other things, segment net sales and operating profit. Segment operating profit excludes general corporate costs, which include executive and director compensation, stock-based compensation, certain pension and other retirement benefit costs, and other corporate facilities and administrative expenses not allocated to the segments. Also excluded are items that the CODM considers not representative of ongoing operations. Such items are referred to as other unallocated items and generally include restructuring and related charges, certain asset impairments and other specifically-identified income or expense items. The segment operating profit metric is what the CODM uses in evaluating our results of operations and the financial measure that provides a valuable insight into our overall performance and financial position.

The following table presents information about our reportable segments, reconciled to consolidated totals:

(\$ in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2022	2021	2022	2021

The intersegment sales elimination, which is required for the presentation of consolidated net sales, represents the elimination of components sold between our segments.

ITEM 2. MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

OVERVIEW

The following discussion is intended to further the reader’s understanding of the consolidated financial condition and results of operations of our Company. It should be read in conjunction with our condensed consolidated financial statements and accompanying notes elsewhere in this Quarterly Report on Form 10-Q (“Form 10-Q”) as well as Management’s Discussion and Analysis of Financial Condition and Results of Operations and the consolidated financial statements and accompanying notes included in our 2021 Annual Report. Our historical financial statements may not be indicative of our future performance. This Management’s Discussion and Analysis of Financial Condition and Results of Operations contains a number of forward-looking statements, all of which are based on our current expectations and could be affected by the uncertainties and risks discussed in Part I, Item 1A of our 2021 Annual Report and in Part II, Item 1A of this Form 10-Q.

Throughout this section, references to “Notes” refer to the notes to our condensed consolidated financial statements (unaudited) in Part I, Item 1 of this Form 10-Q, unless otherwise indicated.

**Non-U.S. GAAP Financial Measures**

For the purpose of aiding the comparison of our year-over-year results, we may refer to net sales and other financial results excluding the effects of changes in foreign currency exchange rates. Organic net sales exclude the impact from acquisitions and/or divestitures and translate the current-period reported sales of subsidiaries whose functional currency is other than USD at the applicable foreign exchange rates in effect during the comparable prior-year period. We may also refer to adjusted consolidated operating profit and adjusted consolidated operating profit margin, which exclude the effects of unallocated items. The unallocated items are not representative of ongoing operations, and generally include restructuring and related charges, certain asset impairments, and other specifically-identified income or expense items. The re-measured results excluding effects from currency translation, the impact from acquisitions and/or divestitures, and excluding the effects of unallocated items are not in conformity with U.S. GAAP and should not be used as a substitute for the comparable U.S. GAAP financial measures. The non-U.S. GAAP financial measures are incorporated in our discussion and analysis as management uses them in evaluating our results of operations and believes that this information provides users with a valuable insight into our overall performance and financial position.

**Our Operations**

We are a leading global manufacturer in the design and production of technologically advanced, high-quality, integrated containment and delivery systems for injectable drugs and healthcare products. Our products include a variety of primary packaging, containment solutions, reconstitution and transfer systems, and drug delivery systems, as well as contract manufacturing, analytical lab services and integrated solutions. Our customers include the leading biologic, generic, pharmaceutical, diagnostic, and medical device companies in the world. Our top priority is delivering quality products that meet the exact product specifications and quality standards customers require and expect. This focus on quality includes a commitment to excellence in manufacturing, scientific and technical expertise and management, which enables us to partner with our customers in order to deliver safe, effective drug products to patients quickly and efficiently.

Our business operations are organized into two reportable segments, Proprietary Products and Contract-Manufactured Products. Our Proprietary Products reportable segment offers proprietary packaging, containment and drug delivery products, along with analytical lab services and other integrated services and solutions, primarily to biologic, generic and pharmaceutical drug customers. Our Contract-Manufactured Products reportable segment serves as a fully integrated business, focused on the design, manufacture, and automated assembly of complex devices, primarily for pharmaceutical, diagnostic, and medical device customers. We also maintain collaborations to share technologies and market products with affiliates in Japan and Mexico.

**Impact of COVID-19 and other Macroeconomic Factors**

West has been actively monitoring the COVID-19 situation and its impact globally. Our primary objectives have remained the same throughout the pandemic: to support the safety of our team members and their families and continue to support patients around the world. Our production facilities continue to operate as they had prior to the COVID-19 pandemic, other than for enhanced safety measures intended to prevent the spread of the virus and higher levels of production at certain plant locations to meet additional customer demand. Our capital and financial resources, including overall liquidity, remain strong. The remote working arrangements and travel restrictions imposed by various governments had limited impact on our ability to maintain operations, as our manufacturing operations have generally been exempted from stay-at-home orders.

However, we cannot predict the impact of the progression of the COVID-19 pandemic on future results due to a variety of factors, including the continued good health of our employees, the ability of suppliers to continue to operate and deliver, the ability of West and its customers to maintain operations, continued access to transportation resources, the changing needs and priorities of customers, any further government and/or public actions taken in response to the pandemic and ultimately the length of the pandemic. We will continue to closely monitor the COVID-19 pandemic in order to ensure the safety of our people and our ability to serve our customers and patients worldwide.

Through the six months ended June 30, 2022, the war between Russia and Ukraine has not had a material impact on the Company’s business, financial condition or results of operations as we do not have manufacturing operations or significant commercial relationships in either country. However, the Company is closely monitoring the broader impact that this war has on availability of raw materials, logistics and access to European energy sources.

RESULTS OF OPERATIONS

We evaluate the performance of our segments based upon, among other things, segment net sales and operating profit. Segment operating profit excludes general corporate costs, which include executive and director compensation, stock-based compensation, certain pension and other retirement benefit costs, and other corporate facilities and administrative expenses not allocated to the segments. Also excluded are items that we consider not representative of ongoing operations. Such items are referred to as other unallocated items for which further information can be found above in the reconciliation from U.S. GAAP to non-U.S. GAAP financial measures.

Percentages in the following tables and throughout the Results of Operations section may reflect rounding adjustments.

**CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS**

Our disclosure and analysis in this Form 10-Q contains some forward-looking statements that are based on management’s beliefs and assumptions, current expectations, estimates and forecasts. We also provide forward-looking statements in other materials we release to the public, as well as oral forward-looking statements. Such statements provide our current expectations or forecasts of future events. They do not relate strictly to historical or current facts. We have attempted, wherever possible, to identify forward-looking statements by using words such as “plan,” “expect,” “believe,” “intend,” “will,” “estimate,” “continue” and other words of similar meaning in conjunction with, among other things, discussions of future operations and financial performance, as well as our strategy for growth, product development, market position and expenditures. All statements that address operating performance or events or developments that we expect or anticipate will occur in the future - including statements relating to sales and earnings per share growth, cash flows or uses, and statements expressing views about future operating results - are forward-looking statements.

Forward-looking statements are based on current expectations of future events. The forward-looking statements are, and will be, based on management’s then-current views and assumptions regarding future events and operating performance, and speak only as of their dates. Investors should realize that, if underlying assumptions prove inaccurate or unknown risks or uncertainties materialize, actual results could vary materially from our expectations and projections. Investors are therefore cautioned not to place undue reliance on any forward-looking statements.

The following are some important factors that could cause our actual results to differ from our expectations in any forward-looking statements:

- sales demand and our ability to meet that demand;
- competition from other providers in our businesses, including customers’ in-house operations, and from lower-cost producers in emerging markets, which can impact unit volume, price and profitability;

- customers’ changing inventory requirements and manufacturing plans that alter existing orders or ordering patterns for the products we supply to them;
- interruptions or weaknesses in our supply chain, including from reasons beyond our control such as extreme weather, longer-term climate changes, natural disasters, pandemic, war, accidental damage, or unauthorized access to our or our customers’ information and systems, which could cause delivery delays or restrict the availability of raw materials, key purchased components and finished products;
- the timing, regulatory approval and commercial success of customer products that incorporate our products and systems;
- whether customers agree to incorporate our products and delivery systems with their new and existing drug products, the ultimate timing and successful commercialization of those products and systems, which involves substantial evaluations of the functional, operational, clinical and economic viability of our products, and the rate, timing and success of regulatory approval for the drug products that incorporate our components and systems;
- the timely and adequate availability of filling capacity, which is essential to conducting definitive stability trials and the timing of first commercialization of customers’ products in Crystal Zenith prefilled syringes;
- average profitability, or mix, of the products sold in any reporting period, including lower-than-expected sales growth of our high-value proprietary product offerings;
- maintaining or improving production efficiencies and overhead absorption;
- dependence on third-party suppliers and partners, some of which are single-source suppliers of critical materials and products, including our Japanese partner and affiliate, Daikyo;
- the loss of key personnel or highly-skilled employees;
- the availability and cost of skilled employees required to meet increased production, managerial, research and other needs, including professional employees and persons employed under collective bargaining agreements;
- the successful and timely implementation of price increases necessary to offset rising production costs, including raw material prices, particularly petroleum-based raw materials;
- the cost and progress of development, regulatory approval and marketing of new products;
- our ability to obtain and maintain licenses in any jurisdiction in which we do business;
- the relative strength of USD in relation to other currencies, particularly the Euro, SGD, the Danish Krone, Yen, Colombian Peso, Brazilian Real, and the South Korean Won; and
- the potential adverse effects of global healthcare legislation on customer demand, product pricing and profitability.

This list sets forth many, but not all, of the factors that could affect our ability to achieve results described in any forward-looking statements. Investors should understand that it is not possible to predict or identify all of the factors and should not consider this list to be a complete statement of all potential risks and uncertainties. For further discussion of these and other factors, see the risk factors disclosed in Part I, Item 1A of our 2021 Annual Report as well as Part II, section 1A of this quarterly report.

Except as required by law or regulation, we undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.
